To Whom It May Concern

Hello,

My name is Salmene and I am a software engineering final year student. I have been developing websites and applications for around 3 years. Most my experience lies in full stack development .

I have worked on several projects using HTML/CSS,Java, JavaScript /TypeScript, PHP,among other scripting languages and I used different frameworks like Spring, SpringBoot, Angular ,ReactJS , NodeJS..

You will find high level summaries of my job duties/education history in my resume. If you want to see some of the projects that I work on in my spare time, see my GitHub profile: https://github.com/salmenerabhi

I am currently looking for an internship for my graduation project, i would like to express my interest and enthusiasm for the opportunity to be part of your team and work on this challenging and advanced project within your company. For this reason, I present my resume below. Aware of the commitment that this internship requires, I am ready and determined to fully invest myself in this opportunity. Thank you for considering my application.

Sincerely,

Salmene Rabhi
